1. **Online on Networking:**

   (Task 1) In your offline you sent LogEntry for each buy and sell operation immediately to the LogMonitor. Now you will sent 4 LogEntries together. In other words, you will wait untill 4 LogEntry is generated and then send them at once.

   (Task 2) Update your acknowledgement process. In your offline you acknowledged every LogEntry. Now you will not send acknowledgement for each LogEntry. You will postpone sending acknowledgement until you need to send a negative acknowledgement. And then send back the numbers of LogEntry that needs to be resent. Your SalesmanThread will then send only those LogEntries. When all the LogEntries are received correctly send the number 5(or any number not in the range 1-4).

   Marks Distribution:

Task	Marks
Task 1	10
Task 2	10
